

MOSQUITO

Anti-bug

Mosquito is a wire screen system which can be fitted to a window, door or sliding door to keep out insects. The system is compatible with all Reynaers window, door and sliding door series as well as series from other system suppliers. Mosquito is available in softline and renaissance style to match your Reynaers system.

The rail for the sliding insect screen is situated above or at the bottom of the door in order to assure optimal comfort. The windows, doors or sliding doors can be opened or closed without taking out the Mosquito system.

MOSQUITO
